FOREWORD

Medicaid Statistics: Program and Financial Statistics, Fiscal Year 1994 is the annual compilation of national Medicaid summary statistical data. Medicaid Statistics is published in response to the need for a consolidated source of current statistical data on a variety of Medicaid program and financial characteristics. This publication offers a compilation of available Medicaid summary statistics for Fiscal Year 1994 (October 1993 - September 1994).

Medicaid Statistics provides selected summary statistical data generated from a variety of Medicaid data sources. Using information obtained from State Medicaid agencies, the Health Care Financing Administration (HCFA) central and regional offices, and the Bureau of the Census, this publication compiles national Medicaid State program and expenditure data. The tables and graphs include profile data on the Medicaid population and Medicaid expenditures by region, State and nationwide. This publication makes such data available to interested parties for informational purposes and purposes of program analysis.

Medicaid Statistics is the result of the combined efforts of staff of the Medicaid Bureau, HCFA regional offices, Bureau of Data Management and Strategy, the Office of the Actuary, the Bureau of the Census, and States. I want to personally commend and thank everyone involved for their dedicated efforts to compile this information into a useful resource document. Previous editions of Medicaid Statistics have been helpful to HCFA and others in making policy and management decisions, responding to inquiries, and improving agency effectiveness in ensuring that Medicaid beneficiaries have access to mandated services and benefits. I believe this book will increase the usefulness of the other Medicaid Statistics books by enabling readers to collect historic data for analyses.

Sally K. Richardson
Director
Medicaid Bureau

PREFACE

Since its inception in July 1965, the Medicaid program has grown from a basic source of health care for the poor to a complex program designed to address the health care needs of a large and diverse population. The increased State and Federal Medicaid expenditures in recent years have created the need for prudent fiscal and program management by both the Federal and State governments. To that extent, HCFA, the States and the health care community require statistical data on services and expenditure patterns in order to develop policy which results in the provision of cost-effective quality health care to the needy.

The importance of the Medicaid program as a major funding source of health care and the rapid increase in Medicaid expenditures has focused attention on the need for a compiled publication of Medicaid statistics. The Health Care Financing Administration (HCFA) published Medicaid Statistics: Fiscal Year 1991 in direct response to the increasing demand for a consolidated source of Medicaid data on a variety of program areas.

The Medicaid Statistics: Fiscal Year 1994 publication offers profile data on the Medicaid population and Medicaid expenditures by region, State and nationwide similar to its predecessors from fiscal years 1991 through 1993. This compilation of State program and financial statistics (October 1993 through September 1994) is intended to provide to Medicaid program administrators and other interested parties a timely release of data summaries available from HCFA. Also, this publication offers a reference directory of contact persons for additional information.

Due to the latitude States have in administering Medicaid, there is considerable interstate Medicaid program variation. This variation has become more diverse as States adopt new eligibility groups, services, reimbursement and administrative policies. In light of this variation, this publication does not attempt to provide the wide range of analysis of the data needed for a complete and comprehensive view of the national Medicaid program. By compiling the array of available Medicaid statistics into one publication, Medicaid Statistics is intended to make timely summary data available for the analyses needed to assist health care administrators in their efforts to provide affordable quality care.

INTRODUCTION

Medicaid Statistics is published in response to the need for one source of timely statistical data on a wide array of Medicaid program and financial characteristics. The statistical information contained in this publication reflects Medicaid program and financial data on a regional and State-by-State basis for FY 1994 (October 1993 - September 1994). In light of the variation of State Medicaid programs nationwide, this publication does not provide an accompanying analysis of the data needed for a complete and comprehensive overview of the Medicaid program. However, this publication provides a valuable data summary upon which interested parties may apply program analyses that are specific to their needs. Finally, Medicaid Statistics facilitates inquiries beyond the scope of the included data by providing the source of tabular data and a directory of persons who can be contacted for further information.

Medicaid Statistics offers statistical data in three sections: a national summary, program statistics and financial statistics. The majority of the data was compiled from information contained in two HCFA reports; the HCFA-2082 and the HCFA-64. The HCFA-2082 is an annual report designed to collect State-reported data on Medicaid beneficiaries and expenditures for the fiscal year. For the purpose of this publication, the term "beneficiaries" is interchangeable with "recipients." The HCFA-64 is a quarterly statement of each State's Medicaid expenditures and captures the actual expenditures for which States are entitled to Federal reimbursement. Some of the major statistical data that can be obtained from Medicaid Statistics include the following:

- Recipients of Medicaid services by eligibility category, demographic characteristics and type of service;
- Medicaid eligibles (total persons on the Medicaid rolls regardless of service utilization) by eligibility category and demographic characteristics;
- Medicaid vendor payments by recipient eligibility category and demographic characteristics and by type of service;
- Medicaid service and provider payment data;
- Third party liability (TPL) collections;
- Medicaid program expenditures (total and Federal share) by service type; and
- Medicaid administrative expenditures (total and Federal share) by type of expenditure.

I. OVERVIEW OF THE MEDICAID PROGRAM

Title XIX of the Social Security Act is a program which provides medical assistance for certain individuals and families with low incomes and resources. The program, known as Medicaid, became law in 1965 as a jointly funded cooperative venture between the Federal and State governments to assist States in the provision of adequate medical care to eligible needy persons. Medicaid is the largest program providing medical and health-related services to America's poorest people.

Within broad national guidelines which the Federal government provides, each of the States: (1) establishes its own eligibility standards; (2) determines the type, amount, duration, and scope of services; (3) sets the rate of payment for services; and (4) administers its own program. Thus, the Medicaid program varies considerably from State to State, as well as within each State over time.

Medicaid Eligibility

States have some discretion in determining which groups their Medicaid programs will cover and the financial criteria for Medicaid eligibility. To be eligible for Federal funds, States are required to provide Medicaid coverage for most individuals who receive federally assisted income maintenance payments, as well as for related groups not receiving cash payments. Some examples of the mandatory Medicaid eligibility groups are:

- recipients of Aid to Families with Dependent Children (AFDC);

- Supplemental Security Income (SSI) recipients (or in States using more restrictive criteria--aged, blind, and disabled individuals who meet criteria which are more restrictive than those of the SSI program and which were in place in the State's approved Medicaid plan as of January 1, 1972);

- infants born to Medicaid-eligible pregnant women. Medicaid eligibility must continue throughout the first year of life so long as the infant remains in the mother's household and she remains eligible, or would be eligible if she were still pregnant;

- children under age 6 and pregnant women who meet the State's AFDC financial requirements or whose family income is at or below 133 percent of the Federal poverty level. (The minimum mandatory income level for pregnant women and infants in certain States may be higher than 133 percent, if as of certain dates the State had established a higher percentage for covering those groups.) States are required to extend Medicaid eligibility until age 19 to all children born after September 30, 1983 in families with incomes at or below the Federal poverty level. This phases in coverage, so that by the year 2002, all poor children under age 19 will be covered. Once eligibility is established, pregnant women remain eligible for Medicaid through the end of the calendar month

ending 60 days after the end of the pregnancy regardless of any change in family income. States are not required to have a resource test for these poverty level related groups. However, any resource test imposed can be no more restrictive than that of the AFDC program for infants and children and the SSI program for pregnant women;

- o recipients of adoption assistance and foster care under title IV-E of the Social Security Act;

- o certain Medicare beneficiaries (described later); and

- o special protected groups who lose cash assistance because of the cash programs' rules, but who may keep Medicaid for a period of time. Examples are: persons who lose AFDC or SSI payments due to earnings from work or increased Social Security benefits; and two-parent, unemployed families whose AFDC cash assistance time is limited by the State and who are provided a full 12 months of Medicaid coverage following termination of cash assistance.

States also have the option to provide Medicaid coverage for other "categorically needy" groups. These optional groups share characteristics of the mandatory groups, but the eligibility criteria are somewhat more liberally defined. Examples of the optional groups that States may cover as categorically needy (and for which they will receive Federal matching funds) under the Medicaid program are:

- o infants up to age one and pregnant women not covered under the mandatory rules whose family income is below 185 percent of the Federal poverty level (the percentage to be set by each State);

- o certain aged, blind, or disabled adults who have incomes above those requiring mandatory coverage, but below the Federal poverty level;

- o children under age 21 who meet income and resources requirements for AFDC, but who otherwise are not eligible for AFDC;

- o institutionalized individuals with income and resources below specified limits;

- o persons who would be eligible if institutionalized but are receiving care under home and community-based services waivers;

- o recipients of State supplementary payments; and

- o TB-infected persons who would be financially eligible for Medicaid at the SSI level (only for TB-related ambulatory services and TB drugs).

Medically Needy Eligibility Groups

The option to have a "medically needy" program allows States to extend Medicaid eligibility to additional qualified persons who may have too much income to qualify under the mandatory or optional categorically needy groups. This option allows them to "spend down" to Medicaid eligibility by incurring medical and/or remedial care expenses to offset their excess income, thereby reducing it to a level below the maximum allowed by that State's Medicaid plan. States may also allow families to establish eligibility as medically needy by paying monthly premiums to the State in an amount equal to the difference between family income (reduced by unpaid expenses, if any, incurred for medical care in previous months) and the income eligibility standard.

Eligibility for the medically needy program does not have to be as extensive as the categorically needy program. However, States which elect to include the medically needy under their plans are required to include certain children under age 18 and pregnant women who except for income and resources would be eligible as categorically needy. They may choose to provide coverage to other medically needy persons: aged, blind, and/or disabled persons; certain relatives of children deprived of parental support and care; and certain other financially eligible children up to age 21. In 1994 there were 40 medically needy programs which provided at least some services to recipients.

Amplification on Medicaid Eligibility

Coverage may start retroactive to any or all of the 3 months prior to application if the individual would have been eligible during the retroactive period. Coverage generally stops at the end of the month in which a person's circumstances change. Most States have additional "State-only" programs to provide medical assistance for specified poor persons who do not qualify for the Medicaid program. No Federal funds are provided for State-only programs.

Medicaid does not provide medical assistance for all poor persons. Even under the broadest provisions of the Federal statute (except for emergency services for certain persons), the Medicaid program does not provide health care services, even for very poor persons, unless they are in one of the groups designated above. Low income is only one test for Medicaid eligibility; assets and resources are also tested against established thresholds. As noted earlier, categorically needy persons who are eligible for Medicaid may or may not also receive cash assistance from the AFDC program or from the SSI program. Medically needy persons who would be categorically eligible except for income or assets may become eligible for Medicaid solely because of excessive medical expenses.

States may use more liberal income and resources methodologies to determine Medicaid eligibility for certain AFDC-related and aged, blind, and disabled individuals under section 1902(r)(2) of the Social Security Act. The more liberal income methodologies cannot result in the individual's income exceeding the limits prescribed for Federal matching (for those groups which are subject to these limits).

Significant changes were made in the Medicare Catastrophic Coverage Act (MCCA) of 1988 which affected Medicaid. Although much of the MCCA was repealed, the portions affecting Medicaid remain in effect. The law also accelerated Medicaid eligibility for some nursing home patients by protecting assets for the institutionalized person's spouse at home at the time of the initial eligibility determination after institutionalization . Before an institutionalized person's monthly income is used to pay for the cost of institutional care, a minimum monthly maintenance needs allowance is deducted from the institutionalized spouse's income to bring the income of the community spouse up to a moderate level.

Scope of Medicaid Services

Title XIX of the Social Security Act requires that in order to receive Federal matching funds, certain basic services must be offered to the categorically needy population in any State program:

- inpatient hospital services;
- outpatient hospital services;
- physician services;
- medical and surgical dental services;
- nursing facility (NF) services for individuals aged 21 or older;
- home health care for persons eligible for nursing facility services;
- family planning services and supplies;
- rural health clinic services and any other ambulatory services offered by a rural health clinic that are otherwise covered under the State plan;
- laboratory and x-ray services;
- pediatric and family nurse practitioner services;
- federally-qualified health center services and any other ambulatory services offered by a federally-qualified health center that are otherwise covered under the State plan;
- nurse-midwife services (to the extent authorized under State law); and
- early and periodic screening, diagnosis, and treatment (EPSDT) services for individuals under age 21.

If a State chooses to include the medically needy population, the State plan must provide, as a minimum, the following services:

- prenatal care and delivery services for pregnant women;
- ambulatory services to individuals under age 18 and individuals entitled to institutional services;
- home health services to individuals entitled to nursing facility services; and
- if the State plan includes services either in institutions for mental diseases or in intermediate care facilities for the mentally retarded (ICF/MRs), it must offer either of the following to each of the medically needy groups: the services contained in 42 CFR sections 440.10 through 440.50 and 440.165 (to the extent that nurse-midwives are authorized to practice under State law or regulations); or the services contained in any seven of the sections in 42 CFR 440.10 through 440.165.

States may also receive Federal funding if they elect to provide other optional services. The most commonly covered optional services under the Medicaid program include:

- clinic services;
- nursing facility services for the under age 21;
- intermediate care facility/mentally retarded services;
- optometrist services and eyeglasses;
- prescribed drugs;
- TB-related services for TB infected persons;
- prosthetic devices; and
- dental services.

States may provide home and community-based care waiver services to certain individuals who are eligible for Medicaid. The services to be provided to these persons may include case management, personal care services, respite care services, adult day health services, homemaker/home health aide, habitation, and other services requested by the State and approved by HCFA.

Amount and Duration of Medicaid Services

Within broad Federal guidelines, States determine the amount and duration of services offered under their Medicaid programs. The amount, duration, and scope of each service must be sufficient to reasonably achieve its purpose. States may place appropriate limits on a Medicaid service based on such criteria as medical necessity or utilization control. For example, States may place a reasonable limit on the number of covered physician visits or may require prior authorization to be obtained prior to service delivery.

Health care services identified under the EPSDT program as being "medically necessary" for eligible children must be provided by Medicaid, even if those services are not included as part of the covered services in that State's plan.

With certain exceptions, a State's Medicaid plan must allow recipients freedom of choice among health care providers participating in Medicaid. States may provide and pay for Medicaid services through various prepayment arrangements, such as a health maintenance organization (HMO). In general, States are required to provide comparable services to all categorically needy eligible persons.

There is an important exception related to home and community-based services "waivers" under which States offer an alternative health care package for persons who would otherwise be institutionalized under Medicaid. States are not limited in the scope of services they can provide under such waivers so long as they are cost effective (except that, other than as a part of respite care, they may not provide room and board for such recipients).

Medicaid - Medicare Relationship

The Medicare program (title XVIII of the Social Security Act) provides hospital insurance (HI), also known as Part A coverage and supplementary medical insurance (SMI), which is known as Part B coverage. For persons aged 65 and older (and for certain disabled persons) who have insured status under Social Security or Railroad Retirement, coverage for HI is automatic. Coverage for SMI, however, requires payment of a monthly premium. Some aged and/or disabled persons are covered under both the Medicaid and Medicare programs.

For Medicare beneficiaries who are also fully eligible for Medicaid, Medicare coverage is supplemented by health care services that are available under the State's Medicaid program. If a person is a Medicare beneficiary, payments for any services covered by Medicare are made by the Medicare program before any payments are made by the Medicaid program. Medicaid is always "payor of last resort." As each State elects, services such as eyeglasses, hearing aids, and nursing facility care not covered by Medicare may be provided by the Medicaid program.

Limited Medicaid benefits are available for certain qualified disabled working individuals (QDWIs), who have earnings sufficiently high to preclude entitlement to Medicare coverage except if the individual purchases coverage, and whose earnings are less than 200 percent of the Federal poverty level (FPL). State Medicaid programs must pay the HI premium for QDWIs with income less than 150 percent of the FPL, and may pay some or all of the HI premium for QDWIs with earnings between 150 and 200 percent of the FPL. Medicaid does not pay SMI premiums for these individuals.

For certain poor Medicare recipients known as "Qualified Medicare Beneficiaries" (QMBs) (those beneficiaries with incomes below the Federal poverty level and with resources at or below twice the standard allowed under the SSI program), the Medicaid program pays the Medicare premiums and cost-sharing expenses for Medicare HI and SMI. For "Specified Low-Income Medicare Beneficiaries" (SLMBs) (those like QMBs, but with slightly higher incomes), the Medicaid program pays only the SMI premiums.

Payment for Medicaid Services

Medicaid operates as a vendor payment program, with payments made directly to the providers. Providers participating in Medicaid must accept the Medicaid reimbursement level as payment in full. Each State has relatively broad discretion in determining (within federally-imposed upper limits and specific restrictions) the reimbursement methodology and resulting rate for services, with three exceptions: (1) for institutional services, payment may not exceed amounts that would be paid under Medicare payment rates; (2) for disproportionate share hospitals (DSHs), different limits apply; and (3) for hospice care services, rates cannot be lower than Medicare rates.

States may impose nominal deductibles, coinsurance, or copayments on some Medicaid recipients for certain services. Emergency services and family planning services must be exempt from such copayments. Certain Medicaid recipients must be excluded from this cost sharing: pregnant women, children under age 18, hospital or nursing home patients who are expected to contribute most of their income to institutional care, and categorically needy HMO enrollees.

The amount of total Federal outlays for Medicaid has no set limit (cap); rather, the Federal government must match whatever the individual State decides to provide, within the law, for its eligible recipients. However, reimbursement rates must be sufficient to enlist enough providers so that Medicaid care and services are available under the plan at least to the extent that such care and services are available to the general population in that geographic area.

States must augment payment to qualified hospitals that provide inpatient services to a disproportionate number of Medicaid recipients and/or other low-income persons under what is known as the disproportionate share hospital (DSH) program. Legislation passed in 1991 has curtailed some States DSH payments.

The portion of the Medicaid program which is paid by the Federal government, known as the Federal Medical Assistance Percentage (FMAP), is determined annually for each State by a formula that compares the State's average per capita income level with the national average. By law, the FMAP cannot be lower than 50 percent nor greater than 83 percent. The wealthier States have a smaller share of their costs reimbursed. The Federal government also shares in the State's expenditures for administration of the Medicaid program. Most administrative costs are matched at 50 percent for all States. However, higher matching rates (75, 90 and 100 percent) are authorized by law for certain functions and activities. State FMAPs are listed in the chapter with financial statistics.

Medicaid Trends

Initially, Medicaid was a medical care extension of federally funded income maintenance programs for the poor, with an emphasis on the aged, the disabled and dependent children and their mothers. Over time, however, Medicaid has been diverging from a firm tie to eligibility for cash programs. Recent legislation ensures Medicaid coverage to an expanded number of low-income pregnant women, poor children, and some Medicare beneficiaries who are not eligible for any cash assistance program, and would not have been eligible for Medicaid under earlier Medicaid rules. Legislative changes focus on enhanced outreach toward specific groups of pregnant women and children, increased access to care, and improved quality of care. Legislation also continued specific benefits beyond the normal run of Medicaid eligibility and placed some restrictions on States' ability to limit some services.

In addition to the increase in numbers of beneficiaries from new legislation, the most pronounced Medicaid service-related trends in recent years have been the continued sharp increase in expenditures for intensive acute care and for home health and nursing facility services for the aged and disabled.

The most significant trend in service delivery is the rapid growth in managed care enrollment within Medicaid. In 1994 almost a quarter of all Medicaid recipients were enrolled in managed care plans. One vehicle for the expansion of managed care, and of new eligibility groups, is the 1115 waiver process which allows States increased flexibility to research health care delivery alternatives while controlling program costs. Another vehicle is the section 1115(b) waiver authority which permits States to implement managed care delivery systems within prescribed parameters.

The cost per Medicaid recipient has increased annually. This is due, primarily, to:

- the accelerated rate of inflation for medical and health-related services when compared to general inflation;

- the ability of new technology to keep more very low birth-weight babies and other critically ill or severely injured persons alive, but in need of continuing very expensive care;

- the increase in rates of reimbursement to the health care providers;

- o the addition of new requirements to the Medicaid program; and

- o the increase in the numbers of very old and disabled persons requiring extensive acute and/or long term health care and related services.

Almost 40.3 million persons were enrolled in Medicaid during fiscal year 1994. Of these, 35.1 million received at least some health care service through the Medicaid program. Total outlays for the program increased from $127.0 billion in 1993 to $137.6 billion for 1994 ($78.6 billion in Federal and $59.0 billion in State monies), plus administrative costs. This includes vendor payments, payments for premiums (i.e., HMOs, Medicare SMI and HI) and payments to disproportionate share hospitals.

II. MEDICAID DATA SOURCES

The primary data sources for the statistical data contained in this publication are the HCFA-2082 and the HCFA-64 reports. The HCFA-2082, "Statistical Report on Medical Care: Eligibles, Recipients, Payments and Services," are annual reports submitted to HCFA from the States. The HCFA-64, "The Quarterly Medicaid Statement of Expenditures for the Medical Assistance Program," is a quarterly HCFA report showing an accounting of actual dollars expended.

Users of these data may note apparent inconsistencies which are primarily due to the difference in the payment information captured on the HCFA-2082 and HCFA-64 reports. There are two reasons that account for the majority of the differences. One substantive difference is due to payments to "disproportionate share hospitals." Disproportionate share hospitals receive higher Medicaid reimbursement than other hospitals because they treat a disproportionate share of Medicaid patients. States determine if hospitals meet the criteria to be considered a "disproportionate share hospital" and establish a formula used to calculate the amount of the payment, subject to certain minimum standards under the law. States claim the Federal match for payments to disproportionate share hospitals on the HCFA-64. States combine this claim either with other inpatient hospital services claims or with mental health facility claims. However, disproportionate share payments to hospitals do not appear on the HCFA-2082 since States directly reimburse these hospitals and there is no fee-for-service billing. The other major difference between the two reports is that the HCFA-64 "expenditures" include premium payments for health insurance, HMO's and Medicare which are growing annually. These dollars are not included on specific claims forms and are therefore excluded from the HCFA-2082's "vendor payments." Vendor payments are limited to fee-for-service data from the States' claims processing systems.

Less significant differences occur between these reports for several reasons. Adjudicated claims data are used in the HCFA-2082 versus the reporting of actual payments reflected in the HCFA-64. Differences also may occur because of internal State practices for capturing and reporting these data through two separate systems. Finally, national totals for the HCFA-64 are different because they include other jurisdictions, such as the Northern Mariana Islands, and American Samoa.

Other sources in this publication include Medicaid managed care enrollment data, third party liability collection data (also from the HCFA-64 report), and population data from the Bureau of the Census.

More detailed descriptions of each report are in front of the section with the appropriate tables.

III. NATIONAL SUMMARIES

The National Summaries section provides graphic and tabular presentations of national summary statistics. These statistics are limited aggregate statistics intended to describe the scope of the national Medicaid program. The data in this section were derived primarily from the HCFA-2082 and HCFA-64 reports and provide national summaries and comparisons on program and payment characteristics on the basis of eligibility, maintenance assistance status, and type of service. This section also compares recipient data to census data on the national population.

This chapter is organized into two sections: (1) National Graphics, and (2) National Tabular Data. The first section includes graphics illustrating national summary and trend data. The second section is a tabular presentation of the accompanying data. Each graph in the first section is generally represented by a corresponding table in the second section. Unless otherwise specified, all recipient counts are displayed in millions, all payment amounts are in billions of dollars, and all percentages are displayed to one-tenth of a percent. Percentages may not sum to 100 percent on some graphs due to rounding errors. Additionally, totals may not sum exactly due to rounding errors.

The summary data contained in this chapter were derived from the more detailed data contained in this publication and are subject to the same caveats as described in the specific sections. Please note the following general information regarding the graphs and tables in this chapter:

- The data contained in Figures 1 through 11 were derived from the HCFA-2082 report. Figures 12 and 13 of the Graphics section extracted data from the HCFA-64 report. Figure 14 contains data from both sources.

- Table 1 of the National Tabular Data section contains data extracted from both the HCFA-2082 and the HCFA-64 reports.

- Tables 9 - 10 of the National Tabular Data section include census data and data from the HCFA-2082 report.

- The data contained in Table 11 of the National Tabular Data section were provided by the Office of Managed Care in HCFA.

- The remaining tables in the National Tabular Data section contain data extracted exclusively from the HCFA-2082 report.

IV. PROGRAM STATISTICS

This section provides summary statistics on recipients, eligibility, vendor payment and services specific to each State. In addition, this section offers population data from the Census Bureau.

Part A contains the HCFA-2082 tables for FY 1994. These tables provide statistical summary data on recipients and payments of adjudicated fee-for-service claims. There are 40 statistical tables in this section.

Part B contains managed care data. The table in this part provides enrollment data on different types of managed care programs for FY 1994.

Part C contains July 1994 census data. The tables in this part provide State-specific population numbers by age and sex. This data is intended to provide a reference framework for Medicaid populations described in the other sections of this publication.

A. THE HCFA-2082 REPORT TABLES

The HCFA-2082 is an annual hard-copy report designed to collect State-reported statistical summary data on eligibles, recipients, services, and expenditures during a Federal fiscal year (i.e., October l through September 30). The data reported for a given year represent recipients of service and the amount of fee for service payments for claims adjudicated during the year by the State claims processing system (typically a Medicaid Management Information System (MMIS)). The data reflect bills adjudicated during the year rather than the services used during the year. These figures do not include lump-sum adjustments or payments made outside the claims processing system such as disproportionate share payments to hospitals or capitated premiums. States summarize and report the data processed through their own Medicaid claims processing and payment operations unless they participate in the Medicaid Statistical Information System (MSIS) project.

Those States participating in the MSIS project provide data tapes from their claims processing systems to HCFA in lieu of the 2082 tables. These data are used by HCFA to produce the 2082 tables for those States. These data also provide HCFA with a large-scale database of State eligibles and services for other analyses.

The purpose of the MSIS project is to collect, manage, analyze and disseminate information on eligibles, recipients, utilization and payment for services covered by State Medicaid programs. States participating in the MSIS project provide HCFA with quarterly computer files containing specified data elements for: (1) persons covered by Medicaid (Eligible files); and, (2) adjudicated claims (Paid Claims files) for medical services reimbursed with Title XIX funds. These data are furnished on the Federal fiscal year quarterly schedule, which begins October 1 of each year.

State Eligible files contain one record for each person covered by Medicaid for at least one day during the reporting quarter. Individual eligible records consist of demographic and monthly enrollment data such as the age, sex, race, basis of eligibility and the maintenance assistance status. The Paid Claims files contain information from fully adjudicated medical service related claims. Three types of claims files representing inpatient, long term care and noninstitutional services are submitted by the States. These are claims that have completed the State's payment processing cycle for which the State has determined it has a liability to reimburse the provider from Title XIX funds. Paid claims records contain information on the types of services provided, providers of services, service dates, costs, types of reimbursement, and epidemiological variables.

State-supplied Medicaid files are subjected to quality assurance edits to ensure that the data are within acceptable error tolerances. Once accepted, three distinct systems are generated from the State files: (1) the Valid Tape File, (2) the MSIS Personal Summary File, and (3) the MSIS HCFA-2082 Totals File. The Valid Tape File contains the validated individual eligible and claim records submitted by the participating States. These files serve as the historical source of detailed Medicaid eligibility and paid claims data maintained by the MSIS. The individual paid claims and eligible information are used to build specialized files

for program analysis and research. The MSIS Personal Summary File represents a fiscal year to date person-specific summary of eligibility and utilization data for each participating State. This is used to successfully address many person-oriented data studies. The MSIS HCFA-2082 Totals File is a highly aggregated database that contains summarized eligibility, recipient and expenditure information, similar in format to the HCFA-2082 report. The data are used to produce various public use reports which represent national Medicaid populations and expenditures.

The States listed below currently are active in the MSIS project. As of October 1, 1994, there are 28 States participating in the MSIS project, of which 24 States are exempt from the requirement to submit the HCFA-2082 report.

STATE	STATUS	START UP YEAR
Alabama	Exempt	1986
Alaska	Testing	1990
Arkansas	Exempt	1986
California	Exempt	1987
Colorado	Testing	1994
Delaware	Exempt	1986
Florida	Testing	1994
Georgia	Exempt	1988
Hawaii	Exempt	1987
Iowa	Exempt	1986
Indiana	Exempt	1988
Kansas	Exempt	1986
Kentucky	Exempt	1986
Maine	Exempt	1987
Minnesota	Testing	1986
Mississippi	Exempt	1992
Missouri	Exempt	1986
Montana	Exempt	1986
Nevada	Exempt	1991
New Hampshire	Exempt	1987
New Jersey	Exempt	1986
North Dakota	Exempt	1986
Pennsylvania	Exempt	1990
Utah	Exempt	1986
Vermont	Exempt	1986
Washington	Exempt	1987
Wisconsin	Exempt	1988
Wyoming	Exempt	1990

The HCFA-2082 data in the attached tables are based on information reported to HCFA by 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands. The data are reported on the HCFA-2082. The tables contained in this publication reflect data up to November 22, 1995. When using the data, note the following caveats and data limitations:

- The accuracy of the data is determined by the quality of the State Medicaid agency's reporting mechanism. However, Federal edits are performed to ensure consistency between column and row totals, both overall and across tables, to identify missing and aberrant statistics, and to check for a number of other potential internal problems.

- HCFA-2082 reports submitted by States frequently contain obvious errors in one or more cells in the report. For cells clearly in error, HCFA estimates values that appear more reasonable.

- Arizona has a Cost Containment Demonstration Project which is funded primarily through capitation payments. Since capitation payments are not included in the total payment tables, HCFA has excluded all of Arizona's capitation payments. As a result, Arizona's Medicaid payment amounts were substantially reduced. However, the recipient data appear reasonable. The distribution of data for Tables 25 through 30 was limited to the total and unknown columns. Table 35 reflects recipient data only. Data from Tables 38 through 40 are excluded.

- Louisiana's total eligible counts do not match the HCFA totals in Tables 31 and 33.

- North Dakota's expenditures for EPSDT appear too high, i.e., $239,204 were reported as Unknown maintenance assistance status.

- Oklahoma failed to report recipients in the unknown column on Tables 26 and 27.

- Puerto Rico's estimated recipient and expenditure data were placed into the unknown column for age and sex. Essentially all of Puerto Rico's Medicaid recipients are Hispanics.

- Rhode Island reported recipient and payments data in Sections A and B for Fiscal Year 1994.

- South Dakota's recipients counts do not match the HCFA totals in Tables 2 and 4. Their payments do not match the HCFA totals in tables 10 and 12.

- Expenditure data include payments for all claims adjudicated or paid during the fiscal year covered by the report. Note that this is not the same as summing payments for services that were rendered during the reporting period.

- State totals for children under age 1 in Tables 25, 28, and 31 may be overstated by as much as 50 percent in non-MSIS States and understated by 10 to 15 percent in MSIS States. Non-MSIS States, that report hard-copy 2082's, may be including children who are between 0 and 1 as of March 31, 1994, plus those born from April 1 through September 30. MSIS States use a fiscal year cut off but omit most newborns from August and September since these children usually are not added to the eligibility file until after the end of the fiscal year.

Data users requiring more detailed information on specific State anomalies and problems may obtain a complete set of data caveats in a separate addendum from the 2082 contact listed in the reference section.

B. MANAGED CARE ENROLLMENT TABLE

This section includes managed care enrollment data from the HCFA Office of Managed Care as of June 1994. These data are reported directly from the States to HCFA annually. Managed care in Medicaid has grown to over 23 percent of recipients in some sort of managed care organization in 1994. The goal of managed care is to offer Medicaid recipients improved access to and better quality of health care services while controlling program costs.

C. CENSUS TABLES

This section includes July 1994 census data. The census data reflect population estimates by age and by sex and are intended as a reference point for the various categories of the Medicaid population reflected in the tables.

V. FINANCIAL STATISTICS

This chapter on financial statistics provides summary statistics on State-specific funding, by both State and Federal match, for program and administrative expenditures. Also included in this chapter are financial statistics for TPL collections.

Part A contains the HCFA-64 tables. These tables reflect State and Federal shares of Medicaid expenditures by region and by State. There are 25 HCFA-64 tables, which are grouped by State shares of program and administrative funds, followed by Federal shares of program and administrative funds.

Part B contains tables on Medicaid TPL collections and cost avoidance by State and by region.

A. THE HCFA-64 REPORT TABLES

The HCFA-64 is a statement of expenditures for the Medicaid program that States submit to HCFA 30 days after each quarter. The report is an accounting statement of actual expenditures made by the States for which they are entitled to receive Federal reimbursement under title XIX for that quarter. The amount claimed on the HCFA-64 is a summary of expenditures derived from source documents such as invoices, cost reports and eligibility records. Along with other Medicaid expenditures, these tables also reflect States' claims for payments to disproportionate share hospitals (DSH). Payments for DSH are subject to change, since not all States have submitted claims for their total DSH allotment. Outstanding DSH amounts up to a capped amount may be claimed by the States in the following year. The FY 1994 DSH payments are broken out from other inpatient hospital or mental health facility claims.

The HCFA-64 report shows the disposition of Medicaid grant funds for the quarter being reported and previous years, the recoupments made or refunds received, and income earned on grant funds. The data on the HCFA-64 are used to reconcile the monetary advance made on the basis of States' funding estimates filed prior to the beginning of the quarter on the HCFA-37. As such, the HCFA-64 is the primary source for making adjustments for any identified overpayments and underpayments to the States. Also incorporated into this process are disallowance actions forwarded from other Federal financial adjustments. Finally, the HCFA-64 report provides information that forms the basis for a series of Medicaid financial reports and budget analyses.

When using data from the HCFA-64 report, please note that Table 1 reflects adjustments not included in the other tables. Table 1 is an aggregate table and reflects adjustments to State grant amounts and represents relatively final fiscal data. Adjustment data are not produced on a line-item basis. The subsequent tables, which are based on individual line items, are not adjusted. Consequently, the line-item tabular totals will not sum to the totals in Table 1.

B. THIRD PARTY LIABILITY (TPL) COLLECTIONS TABLES

Third party liability refers to the legal obligation of certain health care sources to pay the medical claims of Medicaid recipients before Medicaid pays these claims. Medicaid pays only after the TPL sources have met their legal obligation to pay. Third parties include:

- o private health insurance;
- o employment-related health insurance;
- o medical support from absent parents;
- o court judgments or settlements from a liability insurer;
- o State workers' compensation;
- o first party probate-estate recoveries;
- o long term care insurance; and
- o other Federal programs.

The two methods States use to handle medical claims involving TPL are cost avoidance and collections. Cost avoidance is deferral of payments of Medicaid claims when insurance is known to be available. The provider of services is required to bill and collect from liable third parties before sending the claim to Medicaid. Collections occur when Medicaid pays the recipient's medical bills and then attempts to recover from liable third parties. This usually happens when Medicaid is not aware of the other insurance until after a claim is paid.

Data on TPL collections are reported by States on the HCFA-64.9A reporting form, which is a subsection of the HCFA-64 financial report. The two tables in this publication show Medicaid TPL collections and cost avoidance by region and by State for FY 1993. Table I shows the State share of TPL cost avoidance and collections. Table II shows the Federal share of TPL cost avoidance and collections.

REFERENCE DIRECTORY

The reference directory provides listings of Federal and State persons to contact regarding the various data material and data sources. This directory is indexed by the organizations responsible for the content of each of the tables. This organizational information is included on the bottom of all tables and graphics. In addition to the specific organizational contact points, we are including a directory of all State Medicaid directors. Inquiries for State-specific information beyond the scope of normal Federal reporting requirements should be referred to these individuals.
